| (3)Flux foaming フラックス発泡量                            | To such an extend that flux will be kept flush with the printed circuit board's top surface on which components are mounted. Preparatory flux must not be applied to that side of printed circuit board on which components are mounted and to the area where terminals are located.<br>プリント基板の部品実装面上にフラックスが周囲から上がらない程度にする。なお、プリント基板の部品実装面上及びスイッチ端子部に予備フラックスが塗布されていないこと。 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                          |             |          |                             |                                |                                                                                                         |                         |           |                          |                                                                                                                                                                                                                                                                                                                                                                          |                               |             |                                        |          |                                                     |                                                                                                                                          |                                                  |                                                                                                                                                                                         |                                |                                                                                                                                                                                                                                   |                             |                                                                                                           |

| DOCUMENT No.<br>KQJ-901                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | TITLE<br>PRODUCT SPECIFICATIONS<br>型 品 仕 様 書 | PAGE<br>5/6 |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------|-------------|
| <p>【Precaution in use】ご使用上の注意</p> <p>A. General 一般項目</p> <p>A1. This product has been designed and manufactured for general electronic devices, such as audio devices, visual devices, home electronics, information devices and communication devices. In case this product is used for more sophisticated equipment requiring higher safety and reliability, such as life support system, space &amp; aviation devices, disaster prevention &amp; security system, please make verification of conformity or check on us for the details.<br/>本製品はオーディオ機器、映像機器、家電機器、情報機器、通信機器などの一般電子機器用に設計・製造したものです。生命維持装置、宇宙・航空機器、防災・防犯機器などの高度な安全性や信頼性が求められる用途に使用される場合は、貴社にて適合性の確認を頂くか、当社へご確認ください。</p> <p>A2. This product is designed and manufactured assuming that it is to be used with the resistance for direct current. If you use other kinds of resistance (inductive (L) or capacitive (C)), please let us know beforehand.<br/>本製品は直流の抵抗負荷を想定して設計・製造されています。その他の負荷(誘導性負荷(L)、容量性負荷(C))で使用される場合は、別途ご相談ください。</p> <p>B. Soldering and assemble to PC board process 半田付、基板実装工程</p> <p>B1. Note that if the load is applied to the terminals during soldering they might suffer deformation and defects in electrical performance.<br/>端子をはんだ付けされる場合、端子に荷重が加わりますと条件によりガタ、変形及び電気的特性劣化のおそれがありますのでご注意ください。</p> <p>B2. Conditions of soldering shall be confirmed under actual production conditions.<br/>はんだ付けの条件の設定については、実際の量産条件で確認されるようお願いいたします。</p> <p>B3. If you use a through-hole PCB or a PCB with smaller thickness than recommended, please previously check the soldering conditions adequately, because there is larger heat stress.<br/>スルーホールプリント基板及び推奨板厚より薄い基板をご使用される場合は推奨基板よりも熱ストレスの影響が大きくなりますので半田付条件については事前に十分な確認をして下さい。</p> <p>B4. If you use a PCB with smaller thickness than recommended, please pay enough attention to rising of switches when mounted.<br/>推奨板厚より薄い基板をご使用の際は、実装時のスイッチ浮きに十分ご注意ください。</p> <p>B5. When the switch is mounted on a printed circuit board, the case shall be held. And insert the product body to the specified fixing plane and fix it giving it the horizontal position. If it isn't fixed horizontally, it may cause malfunction.<br/>本スイッチをプリント基板へ取り付けける場合は、ケースを持って行って下さい。製品本体を規定の取付面まで挿入して水平になるように取り付けてください。水平にならないまま取り付けますと、動作不良の要因となります。</p> <p>B6. If the stem is given stress from the side, it may result in damages to switch functions. Therefore please handle it with extreme care.<br/>When the switch is carried, any shock shall not be applied to the stem.<br/>ステムに横からの力が加わりますと、スイッチの機能破壊につながる危険性がありますので取扱いは十分注意して下さい。<br/>移動する場合はステムに衝撃が加わらない様に注意して下さい。</p> <p>B7. Do not press the stem but the switch body when you correct rising of the switch mounted on PCB.<br/>基板実装後スイッチの浮きを修正する際は、スイッチのステムを押さずにスイッチ本体を押す様にして下さい。</p> <p>B8. Since the stem of this switch is not designed to endure high temperatures, do not put it in the oven after it is mounted on the PCB even if you need to harden adhesive.<br/>本スイッチは、ステムの耐熱性の問題からスイッチ取付後に接着剤硬化等のための熱硬化炉には通さないでください。</p> <p>B9. Take most care not to let flux foam penetrate the switch when you perform auto-dip soldering, which may sometimes produce too much foam. Take special care when you have LED or grounded terminals.<br/>オートディップの場合フラックスの発泡量過多によりフラックスがスイッチ内部に浸入する場合がありますので十分にご注意ください。<br/>(LED付・アース端子付の場合は特にご注意ください)</p> <p>C. Washing process 洗浄工程</p> <p>C1. Following the soldering process, do not try to clean the switch with a solvent or the like.<br/>半田付け後、溶剤等でスイッチを洗浄しないでください。</p> <p>D. Mechanism design (switch layout) 機構設計</p> <p>D1. The dimensions of a hole and pattern for mounting a printed circuit board shall refer to the recommended dimensions in the engineering drawings.<br/>プリント基板取付穴及びパターンは、製品図に記載されている推奨寸法をご参照下さい。</p> <p>D2. Do not use the switch in a manner that the stem will be given stress from the side. If you push the stem from the side, the switch may be broken.<br/>ステムを横方向から押す様な使い方は避けて下さい。ステム先端に横方向から荷重が加わりますとスイッチが破壊される場合があります。</p> <p>D3. Press the center of the stem. Click feel may be changed, if you press the edge. This is because the center will be displaced, depending on the hinge structure or cumulative tolerances. When you use the hinge structure, take special care so that the keytop point to press the switch won't move.<br/>ステムのセンターを押す様にして下さい。ヒンジ構造及びセット上の累積公差によるセンターズレなどステムを端押しする状態では感触が変化することがありますヒンジ構造の場合は、押下時ステム押し位置が移動しますので、特にご注意ください。</p> <p>D4. This switch is designed for unit construction that it is pressed by human operation. Please avoid using this switch as mechanical detecting function.<br/>In case such detecting function is required, please consult with our detector switch section.<br/>当スイッチは、直接人の操作を介してスイッチを押す構造にてご使用下さい。メカ的な検出機能へのご使用は、避けて下さい。<br/>検出機能には弊社検出スイッチをご使用下さい。</p> <p>D5. The switch will be broken, if you give larger stress than specified. Take most care not to let the switch be given larger stress than specified.<br/>(Refer to the strength of the stopper.)<br/>スイッチ操作時に規定以上の荷重が加わるとスイッチが破壊する場合があります。スイッチに規定荷重以上の力が加わらない様にご注意下さい。<br/>(ストッパー強度参照)</p> |                                              |             |

| DOCUMENT No.<br>KQJ-901                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | TITLE<br>PRODUCT SPECIFICATIONS<br>製品仕様書 | PAGE<br>6/6 |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                          |             |
| <p>E. Using environment 使用環境</p> <p>E1. Do not use this switch in the atmosphere with high humidity or with bedewing probability, because such atmosphere may cause leak among terminals.<br/>高湿度環境下、又は結露する可能性がある環境では、端子間の電流リークが発生する可能性がありますので本スイッチはご使用にならないでください。</p> <p>F. Storage method 保管方法</p> <p>F1. If you don't use the product immediately, store it as delivered in the following environment: with neither direct sunshine nor corrosive gas and in normal temperatures. However, it is recommended that you should use it as soon as possible before six months pass.<br/>製品は納入形態のまま常温、常湿で直射日光の当たらず腐食性ガスが発生しない場所に保管し納入から6ヶ月以内を限度として出来るだけ早くご使用ください。</p> <p>F2. After you break the seal, you should put the remaining in a plastic bag to separate it from the outside and store it in the same environment mentioned above. You should use it up as soon as possible.<br/>開封後はポリクロで外気との遮断を図り上記と同じ環境下で保管しすみやかにご使用下さい。</p> <p>F3. Do not stack too many switches for strafe.<br/>過剰な積み重ねは行わないで下さい。</p> <p>G. Others. その他</p> <p>G1. This specification will be invalid one year after it is issued, if you don't return it or don't place an order.<br/>本仕様書は発行日より1年間を経過して、ご返却又はご注文の無い場合は、無効とさせていただきます。</p> <p>G2. Please understand that the specifications other than electric and mechanical characteristics and outside dimensions may be changed at our own discretion.<br/>電氣的、機械的特性、外觀寸法および取付寸法以外につきましては、当社の都合により変更させて頂く事が有りますので、あらかじめ御了承下さい。</p> <p>G3. Never use the product beyond the rating. It may catch fire. If you think that the product may be used beyond the rating due to some abnormal conditions, you must take certain protective measures, such as a protective circuit to shut down the current.<br/>定格を超えての使用は火災発生のおそれがありますので絶対に避けて下さい。また異常使用等で定格を超える恐れがある場合は保護回路等で電流遮断等の対策をして下さい。</p> <p>G4. The flammability grade of the plastic used for this product is "94HB" by the UL Standard (slow burning). Therefore, either refrain from using it in the place where it can catch fire, or take measures to preclude catching fire.<br/>本製品に使用している樹脂等の燃焼グレードはUL規格の"94HB"(遅燃性グレード)相当を使用しております。つきましては類焼の恐れがある場所での使用を禁止するか、類焼防止対策をお願いします。</p> <p>G5. Though we are confident in switch quality, we cannot deny the possibility that they could fail due to short or open circuit. Therefore, if you use a switch for a product requiring higher safety level, we would like you to verify in advance what effects your module would receive in case the switch alone should fail. And secure safety as a whole system by introducing the fail-safe design, i.e. a protection network.<br/>スイッチの品質には万全を尽くしていますが故障モードとしてショート、オープンが発生が皆無とは言えません。安全性が重視されるセットの設計に際しては、スイッチの単品故障に対してセットとしての影響を事前にご検討いただき、保護回路等のフェールセーフ設計のご検討を十分に行い安全を確保して頂きますようお願いいたします。</p> |                                          |             |
