| 10.3 Other precautions<br>For soldering<br>半田付けに関する<br>その他注意事項 | <p>(1) Switch terminals and PCB. Upper face shall be free from flux prior to soldering.<br/>事前にスイッチの端子及びプリント基板の部品実装面上にフラックスが塗られていないこと。</p> <p>(2) Following the soldering process, do not try to clean the switch with a solvent or the like.<br/>半田付け後、溶剤などでスイッチを洗浄しないで下さい。</p> <p>(3) Recommended cream solder : M705-GRN360-K2 (SENJU METAL INDUSTRY CO.,LTD) or equivalent<br/>推奨クリーム半田 : 千住金属工業(株) M705-GRN360-K2 同等品</p> <p>(4) When chip components is soldered on the back side of PCB by automatic flow soldering, after this switch soldered by reflow soldering, flux will possibly creep up at the exterior wall of the housing and penetrate into the housing due to flux ejection. Therefore, when the PCB is designed, please do not locate through holes adjacent to the switch mounted area.<br/>本スイッチをリフロー半田後、プリント基板裏面をディップ半田して使用する場合は、ディップ時のフラックス吹き上げ等によりスイッチ側面からフラックスがはい上がる場合がありますので、パターン設計にあたってはスイッチ下面、周囲にスルーホールを設けないで下さい。</p> <p>(5) As the conditions vary somehow depending on the kind of reflow soldering equipment, please make sure you have the right one before use.<br/>リフロー槽の種類により、多少条件が異なりますので、事前に十分確認の上使用してください。</p> <p>(6) As the click rate may deteriorate when heat is applied repeatedly, reflow soldering should be performed in the shortest period and at the lowest temperature possible.<br/>熱履歴が加わるとクリック感が低下する可能性がありますので極力低温短時間でリフローを行うようにお願いします。</p> <p>(7) Safeguard the switch assembly against flux penetration from its top side.<br/>スイッチの上面からフラックスが浸入しないようにして下さい。</p> <p>(8) The thickness of cream solder : 0.15 mm<br/>クリーム半田印刷厚 : 0.15 mm</p> <p>(9) Thickness of printed circuit board shall be 1.6 mm.<br/>基板厚さは 1.6mm を推奨します。</p> |             |

| DOCUMENT No.<br>KRN-702                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | TITLE<br>製品仕様書 | PRODUCT SPECIFICATIONS | PAGE<br>5/6 |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|------------------------|-------------|
| <p>【Precaution in use】ご使用上の注意</p> <p>A. General 一般項目</p> <p>A1. This product has been designed and manufactured for general electronic devices, such as audio devices, visual devices, home electronics, information devices and communication devices. In case this product is used for more sophisticated equipment requiring higher safety and reliability, such as life support system, space &amp; aviation devices, disaster prevention &amp; security system, please make verification of conformity or check on us for the details.<br/>本製品はオーディオ機器、映像機器、家電機器、情報機器、通信機器などの一般電子機器用に設計・製造したものです。生命維持装置、宇宙・航空機器、防災・防犯機器などの高度な安全性や信頼性が求められる用途に使用される場合は、貴社にて適合性の確認を頂くか、当社へご確認ください。</p> <p>A2. This product is designed and manufactured assuming that it is to be used with the resistance for direct current. If you use other kinds of resistance (inductive (L) or capacitive (C)), please let us know beforehand.<br/>本製品は直流の抵抗負荷を想定して設計・製造されています。その他の負荷(誘導性負荷(L)、容量性負荷(C))で使用される場合は、別途ご相談ください。</p> <p>B. Soldering and assemble to PC board process 半田付、基板実装工程</p> <p>B1. Note that if the load is applied to the terminals during soldering they might suffer deformation and defects in electrical performance.<br/>端子をはんだ付けされる場合、端子に荷重が加わりますと条件によりガタ、変形及び電気的特性劣化のおそれがありますのでご注意ください。</p> <p>B2. Conditions of soldering shall be confirmed under actual production conditions.<br/>はんだ付けの条件の設定については、実際の量産条件で確認されるようお願いします。</p> <p>B3. As this TACT switch is designed for reflow soldering, if you place it at the edge of PCB for convenience, then flux may get into the sliding part of the SW during automatic dip soldering after being mounted, so do not apply auto dip after being mounted.<br/>当タクトスイッチはリフロー半田対応ですが、スイッチ実装後にオートディップを行う場合にスイッチが基板の端にあるとフラックスが浸入する恐れがありますので十分にご注意下さい。</p> <p>B4. As the click rate may deteriorate when heat is applied repeatedly, reflow soldering should be done within the recommended conditions.<br/>熱履歴が加わるとクリック感が低下する可能性がありますので推奨リフロー条件以内でリフローを行う様にお願いします。</p> <p>B5. This detector switch is available N<sub>2</sub> reflow soldering.<br/>当スイッチは窒素リフローが可能です。</p> <p>C. Washing process 洗浄工程</p> <p>C1. Following the soldering process, do not try to clean the switch with a solvent or the like.<br/>半田付け後、溶剤等でスイッチを洗浄しないでください。</p> <p>D. Mechanism design (switch layout) 機構設計</p> <p>D1. The dimensions of a hole and pattern for mounting a printed circuit board shall refer to the recommended dimensions in the engineering drawings.<br/>プリント基板取付穴及びパターンは、製品図に記載されている推奨寸法をご参照下さい。</p> <p>D2. You may dip-solder chip components on the backside of PCB after you have reflow-soldered this switch. However, dip-soldering may cause flux to Creep up on the wall of the housing and penetrate the switch. Therefore, do not design a through-hole under and around the switch.<br/>本スイッチをリフロー半田後、プリント基板裏面をディップ半田して使用する場合は、ディップ時のフラックス吹き上げ等により、スイッチ側面より、フラックスがはい上がる場合がありますので、パターン設計にあたっては、スイッチ下面、周囲にスルーホールを設けないで下さい。</p> <p>D3. Do not place something pointy on the scaling film of the switch.<br/>スイッチのフィルム部分を鋭利なもので押さえることは避けて下さい。</p> <p>D4. Please avoid using this switch as mechanical detecting function.<br/>In case such detecting function is required, please consult with our detector switch section.<br/>当スイッチは、直接人の操作を介してスイッチを押す構造にてご使用下さい。<br/>メカ的な検出機能へのご使用は、避けてください。<br/>検出機能には弊社検出スイッチをご使用下さい。</p> <p>D5. The switch will be broken, if you give larger stress than specified. Take most care not to let the switch be given larger stress than specified.<br/>(Refer to the strength of the stopper.)<br/>In addition, in case stress applied to the area, which is out of actuator, this may also cause the similar damage or breakage to the switch.<br/>Enough care shall be taken to assure that stress is properly applied to actuator.<br/>スイッチ操作時に規定以上の荷重が加わるとスイッチが破損する場合があります。スイッチに規定荷重以上の力が加わらない様にご注意下さい。<br/>(ストッパー強度参照)<br/>また、荷重の加わる位置が操作範囲外であった場合にも、同様にスイッチの破損が考えられますので、操作範囲外には荷重を加えないで下さい。</p> <p>D6. Shape of keying tip: 打鍵部先端形状<br/>・It is recommended that the tip of the keying section is to be SR3 (φ1.2). Also, ABS or PC resin is recommended for its material.<br/>下図に示すφ1.2mm 先端 SR3 の形状を推奨いたします。尚、材質は ABS または PC 等の樹脂を推奨致します。</p> |                |                        |             |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                |                        |             |

| DOCUMENT No.<br>KRN-702                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | TITLE<br>製品仕様書 | PRODUCT SPECIFICATIONS<br>製品仕様書 | PAGE<br>6/6 |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                |                                 |             |
| <p>D7. Restriction in Operation: 操作条件</p> <ul style="list-style-type: none"> <li>Allowable misalignment between the center of the switch and the center of keying section is 0.5mm(max).<br/>スイッチ外形を基準とする中心軸線から打鍵部中心軸線間のセンターズレは0.5mm以下にて御使用下さい。</li> </ul> <p>D8. Please avoid designing keytop to be projecting from set case. This may cause breakage of switch due to mechanical impact applied to switch body.<br/>セットキートップがセット筐体から出るようなご使用方法は避け下さい。スイッチに衝撃荷重が加わりスイッチ破壊の原因となります。</p> <p>D9. Please make sure that switch is mounted without any flexure of PCB.<br/>基板がたわむような場所への設置は避け下さい。</p> <p>E. Using environment 使用環境</p> <p>E1. Do not use this switch in the atmosphere with high humidity or with bedewing probability, because such atmosphere may cause leak among terminals.<br/>高温多湿環境下、又は結露する可能性がある環境では、端子間の電流リークが発生する可能性がありますので本スイッチはご使用にならないでください。</p> <p>E2. This switch is non-sealing type tact switch. If any water drops happen to be on switch, it may penetrate into inside of switch, exposing corrosion.<br/>本スイッチは非密閉タイプです。水滴等が付着した場合は、スイッチ内部へ浸入し腐食等が発生しますのでご注意ください。</p> <p>F. Storage method. 保管方法</p> <p>F1. If you don't use the product immediately, store it as delivered in the following environment: with neither direct sunshine nor corrosive gas and in normal temperatures. However, it is recommended that you should use it as soon as possible before six months pass.<br/>製品は納入形態のまま常温、常湿で直射日光の当たらず腐食性ガスが発生しない場所に保管し納入から6ヶ月以内を限度として出来るだけ早くご使用ください。</p> <p>F2. After you break the seal, you should put the remaining in a plastic bag to separate it from the outside and store it in the same environment mentioned above. You should use it up as soon as possible.<br/>開封後はポリフクロで外気との遮断を図り上記と同じ環境下で保管しすみやかにご使用下さい。</p> <p>F3. Do not stack too many switches for strafe.<br/>過剰な積み重ねは行わないで下さい。</p> <p>G. Others. その他</p> <p>G1. This specification will be invalid one year after it is issued, if you don't return it or don't place an order.<br/>本仕様書は発行日より1年間を経過して、ご返却又はご注文の無い場合は、無効とさせていただきます。</p> <p>G2. Please understand that the specifications other than electric and mechanical characteristics and outside dimensions may be changed at our own discretion.<br/>電気的、機械的特性、外観寸法および取付寸法以外につきましては、当社の都合により変更させて頂く事がありますので、あらかじめ御了承下さい。</p> <p>G3. Never use the product beyond the rating. It may catch fire. If you think that the product may be used beyond the rating due to some abnormal conditions, you must take certain protective measures, such as a protective circuit to shut down the current.<br/>定格を超えての使用は火災発生のおそれがありますので絶対に避けて下さい。また異常使用等で定格を超える恐れがある場合は保護回路等で電流遮断等の対策をして下さい。</p> <p>G4. The flammability grade of the plastic used for this product is "94HB" by the UL Standard (slow burning). Therefore, either refrain from using it in the place where it can catch fire, or take measures to preclude catching fire.<br/>本製品に使用している樹脂等の燃焼グレードはUL規格の"94HB"(遅燃性グレード)相当を使用しております。つきましては類焼の恐れがある場所での使用を禁止するか、類焼防止対策をお願いします。</p> <p>G5. Though we are confident in switch quality, we cannot deny the possibility that they could fail due to short or open circuit. Therefore, if you use a switch for a product requiring higher safety level, we would like you to verify in advance what effects your module would receive in case the switch alone should fail. And secure safety as a whole system by introducing the fail-safe design, i.e. a protection network.<br/>スイッチの品質には万全を尽くしていますが故障モードとしてショート、オープンが発生が皆無とは言えません。安全性が重視されるセットの設計に際しては、SWの単品故障に対してセットとしての影響を事前にご検討いただき、保護回路、等のフェールセーフ設計のご検討を十分に行い安全を確保して頂きますようお願いいたします。</p> |                |                                 |             |
